

# NON-GLYCOL RACING COOLANT

**READY TO USE FORMULA**

AstroChem™ Non-Glycol Racing Coolant is a water based coolant designed for all racing engines. This innovative product contains no glycols or polyglycols making it an environmentally friendly product containing a broad spectrum corrosion inhibitor package and is premixed with deionized water. Proprietary ingredients provide maximum heat transfer in extreme temperatures and operating conditions allowing for greater horsepower without overheating. Meets the most stringent racing specs and is AMA Pro Racing, WERA, CCS, and ASRA track approved.

## Details:
